Jubilee leaders dismiss Nasa's 10m votes claim

Jubilee leaders yesterday dismissed Nasa's claim that it will garner more than 10 million votes in the coming elections. They said Nasa leaders had no agenda for Kenyans but simply want to change the Constitution to award themselves top positions. The leaders — Elgeyo-Marakwet Senator Kipchumba Murkomen, Kericho Senator Aaron Cheruyoit and West Pokot Governor Simon Kachapin — were speaking at Surumben.

New technology to make road construction cheaper

The Busia County Government is adopting a specialised Japanese construction technology called Do-nou to help it make more roads at a cheaper cost. The technology provided by a Japanese CORE involves the use of gunny bags filled with murram, sand or gravel to repair roads. Speaking in Nambale, Governor Sospeter Ojaamong said this would also create jobs for youth.

Busia. Youths trained on construction of roads

■ The county has partnered with private organisations to provide training for unemployed youth. Governor Sospeter Ojaamong said after the training the youths would be absorbed into the county's workforce or facilitated to start their own businesses. The governor was speaking yesterday at a ceremony to honour 100 youths in Madende, Nambale constituency, who had completed a training course on the construction of roads and bridges, which was conducted by Japan's Community Road Empowerment (CORE). CORE's project manager, Yuka Iwamura, said eight of the youths would go for further training at the Kenya Institute of Highways and Building Technology.
